

FOR IMMEDIATE RELEASE

Altova Launches MobileTogether 4.0 with Push Notifications and More

Beverly, Mass., November 8, 2017 – Altova® (<http://www.altova.com>) announced availability of MobileTogether 4.0, its framework for cross-platform mobile app development. This release adds support for push notifications, embedding mobile solutions in a web application, and other functionality for building sophisticated, data-centric apps for iOS, Android, Windows, and other platforms.

Here are just a few highlights of the newly released features:

- **Support for push notifications** with new actions that make it easy for developers to define the sending and receiving of notifications to one or multiple devices.
- Ability to **embed MobileTogether solutions** in a web application to enable web based form applications and other functionality. Data can be communicated back and forth between the MobileTogether app and the web application.
- Several **new actions** for defining app functionality, including: Load/Save String, Read Folder, Set Language manually, and more.
- Ability to **call Altova MapForce Server directly** to perform any-to-any data conversion. This greatly expands the list of legacy and other data formats that may be used in a MobileTogether app.
- A new **Server Usage Statistics app** for the server administrator that makes it easy to get an accurate view of the usage and popularity of each app on your MobileTogether Server.
- **Support for Android 6.0, 7.0, 7.1**
- **Support for PostgreSQL 9.6**

These and many additional features are available in Version 4.0 of MobileTogether. For a complete list of new features please visit: (<https://www.altova.com/mobiletogether/whatsnew>)

About Altova

Altova® is a software company specializing in tools that assist developers with data management, software and application development, mobile development, and data integration. The creator of XMLSpy® and other award-winning products, Altova is a key player in the software tools industry and the leader in XML solution development tools. The company offers a complete line of desktop developer software for XML, SQL, and UML; high-performance workflow automation server products; and a cross-platform mobile development platform. Altova focuses on its customers' needs by offering a product line that fulfills a broad spectrum of requirements for software development teams. With over 5 million users worldwide, including 91% of Fortune 500 organizations, Altova is honored to serve clients from one-person shops to the world's largest organizations. Altova is committed to delivering standards-based, platform-independent solutions that are powerful, affordable and easy-to-use. Founded in 1992, Altova is headquartered in Beverly, Massachusetts and Vienna, Austria.
